

‘Science on Wheels’ flag off at Vadodara

L&T Public Charitable Trust has joined hands with Agastya International Foundation, an NGO which runs one of the largest ‘hands-on’ science education programmes, to implement the ‘Science on Wheels’ project for around 20 schools in Vadodara.

The mobile van has around 160 models for conducting interactive experiments linked to school syllabus. Two trained instructors will visit the identified schools as per schedule with the mobile van to help students in practical learning.
