Doorstep diagnosis to the underserved

Vadodara Mahanagar Seva Sadan (VMSS) and Larsen & Toubro Public Charitable Trust (LTPCT) have jointly launched a 'health on wheels' project on May 31, 2014 under the public private partnership model to offer 'Sahaj Sarvar' healthcare services to the urban underprivileged.

'Sahaj Sarvar' shall provide free healthcare services - diagnosis and preliminary treatment - to the underprivileged in their areas of living. The services will be provided to the target population using a medical van which will visit the areas on a regular basis. In this regard, VMSS has handed over two mobile medical units to LTPCT to operationalize the services.

LTPCT is already providing healthcare services using its own mobile unit ('Mobile clinic') in the rural areas of Vadodara.
